PROGRAM

OF THE

Society of American Bacteriologists

FIRST MEETING

NEW HAVEN, CONN.

December 27, 28 and 29, 1899
PROGRAM.

"Generic Nomenclature of Bacteria."
ERWIN F. SMITH, U. S. Department of Agriculture.

"Natural Varieties of Bacteria."
H. W. CONN, Wesleyan University.

"The Significance of Varieties among Pathogenic Bacteria."
THEOBALD SMITH, Harvard Medical School.

"Some Suggestions in the Study of Systematic Bacteriology."
F. D. CHESTER, Delaware College Agricultural Experiment Station.

"Methods Employed in the Teaching of Bacteriology."
H. C. ERNST, Harvard University.

"On the Use of Steam for Sterilization."
H. A. HARDING, N. Y. Agricultural Experiment Station.

"On the Utility of the Supply of Live Steam in the Laboratory."
H. A. HARDING, N. Y. Agricultural Experiment Station.

"Dependence upon the supposed Antiseptic Properties of Thymol and Chloroform as a Source of Error in certain Bio-chemical Investigations."
ERWIN F. SMITH, U. S. Department of Agriculture.

"Experimental and Statistical Studies on the Influence of Cold upon the Bacillus of Typhoid Fever and its Distribution."
“Certain Practical Applications of Bacteriology to Dairying.”
H. W. Conn, Wesleyan University.

“The importance of Bacterial Tests in the sanitary supervision of municipal milk supplies.”
M. O. Leighton, Board of Health, Montclair, N. J.

“On the Commercial Value of Bacteriological Analysis of Milk Supplies.”
S. C. Keith, Jr., Boston, Mass.

“The Bacterial Invasion of the Normal Udder.”
Archibald K. Ward, Agricultural Exp. Station, Cornell University.

“Significance of the appearance of Bac. Coli Com. in Filtered Waters.”

“On the Detention of Bacillus Coli Communis in Water.”
E. O. Jordan, University of Chicago.

“A comparison of B. Coli Communis from different species of animals.
V. A. Moore and Floyd R. Wright, Cornell University.

“Recent Work on Sewage Purification involving Bacteria.”

“On the change of opinion in England in favor of the Bacterial Purification of Sewage.”
Prof. L. P. Kinnicutt, Polytechnic Institute.

“On Bacillus Enteritidis Sporogenes (Kline.)”
Adolf Gehrmann, Chicago.
“Are Bacteria Concerned in the So-called Fermentation of Tobacco?”
OSCAR LOEW, U. S. Department of Agriculture.

“On the Bacteriology of Canned Foods, with a detailed Account of Bacteria detected in Sour Corn.”
S. C. PRESCOTT and W. LYMAN UNDERWOOD, Mass. Institute of Technology,

“On Bacteria-dissolving Enzymes.”
OSCAR LOEW, U. S. Department of Agriculture.

“A New Pathogenic Fungus (Sporothrix of Schenck).”
LUDWIG HEKTORN, Rush Medical College, Chicago.

“Demonstration of Actinomycosis and the causative Fungus.”
H. C. ERNST, Harvard University.

“Exhibition of cultures and stained specimens of plague bacillus from two cases of Bubonic Plague admitted to New York harbor, November, 1899.”
WM. HALLECK PARK, Laboratory of N. Y. Board of Health.

“Notes on the effect of blood serum from tuberculous animals and men on the tubercle bacillus when mixed with it in the culture tube and hanging drop.”
WM. HALLECK PARK, Laboratory of N. Y. Board of Health.
